

PROJECT

DroC2om

Drone Critical Communications

Funding: European (Horizon 2020)

Duration: Sep 2017 - Aug 2019

Status: Complete

Total project cost: €1,270,543

EU contribution: €1,270,543

Call for proposal: H2020-SESAR-2016-1

[CORDIS RCN : 211428](#)

Objectives:

The key objective of the DroC2om project is to contribute to the definition of integrated cellular-satellite data link specifications for UASs. Major focus will be on the design and evaluation of data links based on experimental radio investigations and system simulations. The primary goal is to design a cellular-satellite system architecture concept, which ensures reliable and safe operation for remote controlled, semi-autonomous and fully autonomous small UAS.

The DroC2om project will design and evaluate an integrated cellular-satellite system architecture concept for data links in order to support reliable and safe operation of UAS based on real drone measurements and modelling.

The diversity of the project partners ensures a balanced and high quality expertise in all relevant technological areas.

- Thales Alenia Space is a key player in aerospace air/ground communications.
- Nokia is one of the major mobile service and infrastructure providers worldwide.
- atesio provides solutions for automatic planning and optimization algorithms of multi-layer multi-service cellular telecommunication networks.
- Aalborg University has a well-established research centre for mobile communications systems.

To meet its objectives, the approach of DroC2om is to structure the work around four main building blocks that will be communicating with each other along the execution of the project following a continuous delivery approach:

1. Definition of scenarios and requirements
2. Software-based evaluation environment for aerial drone communication
3. Aerial communication system architecture
4. Drone flight and measurements

All these four building blocks will be structured by a tight and rigorous management action from the project manager (PM) and the technical manager (TM), and complemented with a particular action devoted to ensure the proper dissemination of all activities, results, and outcomes of the project to maximize impact and visibility of the actions carried out.

Parent Programmes:

[H2020-EU.3.4. - Horizon 2020: Smart, Green and Integrated Transport](#)

Institute type: Public institution

Institute name: European Commission

Funding type: Public (EU)

Lead Organisation:

Aalborg Universitet

Address:

FREDRIK BAJERS VEJ 5
9220 AALBORG
Denmark

Organisation Website:

<http://www.aau.dk>

EU Contribution: €285,250

Partner Organisations:

Thales Alenia Space France

Address:

26, AVENUE JF CHAMPOLLION
31037 TOULOUSE
France

Organisation Website:

<http://www.thalesaleniaspace.com>

EU Contribution: €284,375

Atesio Gmbh

Address:

BUNDESALLEE 89
12161 BERLIN
Germany

EU Contribution: €282,938

Nokia Solutions And Networks Danmark As

Address:

ORESTADS BOULEVARD 73 3
2300 KOBENHAVN
Denmark

EU Contribution: €417,980

Technologies:

Aircraft operations and safety
Drone traffic management system

Development phase: Research/Invention

STRIA Roadmaps: Cooperative, connected and automated transport, Smart mobility and services

Transport mode: Air transport

Transport sectors: Freight transport

Geo-spatial type: Other
