

PROJECT

Seven Europe Network

Funding: European

Duration: Jun 2018 - Dec 2021

Status: Ongoing

Objectives:

The Action aims to deploy a network of 13 stations delivering bio natural gas using a direct distribution system in the French Occitanie region, along the Mediterranean Corridor, opening up the access to the Atlantic corridor. It will enable synergies between local actors to develop sustainable mobility and ensure a non-discriminatory accessibility of the infrastructure.

The stations will create long-term jobs and boost economy. The Action is part of a Global Project which embeds the construction of 2 bio-methane units and the procurement of 449 NGV vehicles by 2022.

Parent Programmes:

[CEF Transport - Connecting Europe Facility \(CEF\) for Transport](#)

Institute type: Public institution

Institute name: Inea

Funding type: Public (EU)

Other countries: France

Lead Organisation:

Seven Occitanie

Address:

710 Rue Favre De Saint Castor
34080 Montpellier
France

Technologies:

Electric road vehicles

Public charging infrastructure

Development phase: Demonstration/prototyping/Pilot Production

STRIA Roadmaps: Transport electrification, Low-emission alternative energy for transport

Transport mode: Road transport

Transport sectors: Freight transport

Transport policies: Environmental/Emissions aspects

Geo-spatial type: Infrastructure Node
