

PROJECT

ECO-Net - Spanish network of alternative fuels refuelling stations

Funding: European

Duration: Mar 2020 - Jun 2022

Status: Ongoing

Total project cost: €12,629,190

EU contribution: €1,262,919

Background & policy context:

The Action is implemented in line with the guidelines established in the Spanish Policy Framework for the development of the alternative fuels market in transport sector and to accelerate large-scale deployment of the relevant Liquefied-to-Compressed Natural Gas (LCNG) infrastructure.

This Action has been selected in the context of the CEF Blending Facility Call, where the CEF support is coupled with substantial investment by a financial institution.

Objectives:

In particular, the Action will enhance the network of publicly available gas stations in Spain by the construction of 15 new stations, located on the Mediterranean and Atlantic Core network corridors as well as on the Comprehensive network.

Methodology:

The Action will promote and contribute to the development of LCNG as a fuel in road transport, by improving the network coverage for its users, thus reducing dependence on fossil fuels and mitigating the environmental impact of road transport.

Parent Programmes:

[CEF Transport - Connecting Europe Facility \(CEF\) for Transport](#)

Institute type: Public institution

Institute name: Inea

Funding type: Public (EU)

Lead Organisation:

Enagas S.a.

Address:

Paseo De Los Olmos, 19
28005 Madrid
Spain

Organisation Website:

<http://www.enagas.es>

Technologies:

Alternative fuels
Natural gas-electric hybrid solution for electrification in off-road applications

Development phase: Validation

STRIA Roadmaps: Low-emission alternative energy for transport, Infrastructure

Transport mode: Road transport

Transport sectors: Passenger transport, Freight transport

Transport policies: Environmental/Emissions aspects, Deployment planning/Financing/Market roll-out

Geo-spatial type: Network corridors
