A worthwhile tool for transport research
TRANSPORT RESEARCH KNOWLEDGE CENTRE

Targets: Connecting transport research solution to European transport policy

- Disseminate and promote the results of transport research conducted in the EU Framework Programmes for research and technological development, in the European Research Area and beyond
TRANSPORT RESEARCH KNOWLEDGE CENTRE

Key objectives

• Access to information on EU, national and international transport research activities and results
• Provide aggregated analysis of transport research results against thematic structure and emerging policy priorities
• Stimulate innovation in transport by accelerating the application of research results through extended networking
HISTORY OF TRANSPORT RESEARCH KNOWLEDGE CENTRE

- **Project EXTRA**  
  (January 1999 - October 2001)

- **Project EXTR@Web**  
  (September 2002 - August 2006)

- **Project TRKC**  
  (February 2007 - August 2009)
TRANSPORT RESEARCH KNOWLEDGE CENTRE
Who is behind it?

- A consortium of 6 contractors including:
  - Engineering companies (FR, DE)
  - Universities and Research institution (UK, IT, CZ)
  - Information & communications consultancy (BE)
- Supported by a network of geographic experts covering the European Research Area (ERA).

TRANSPORT RESEARCH KNOWLEDGE CENTRE

Projects & Analysis

Search the database of European and national transport projects to assess different scales of project status (tasks, results, progress summaries), results with thematic analysis. Results and thematic findings are provided at project level and project stakeholders, policy implications are analysed across projects contributing to specific themes and presented in thematic reports. The site may include any combination of a year to be found by keywords, transport modes, and policy areas.

You can include any combination of a search. More specific search categories are available on the advanced search box. For more information on how to search, please refer to the FAQ.
