FAST DANUBE

2014-EU-TMC-0297-S

Rhine-Danube Corridor

Located in a pre-identified section of the Rhine-Danube Corridor (Bulgarian/Romanian common section), the Action aims to accelerate the removal of an existing bottleneck along this cross-border section of the Danube as it will identify the works to achieve stable navigation capacity all year round.

It is part of a Global Project to implement the Fairway Rehabilitation and Maintenance Danube Master Plan.

The Action consists of 4 activities from the completion of the Environmental Impact Assessment and building permits documentation to the drafting of the tender designs for future works.

The Action is a precondition for the implementation of any physical interventions aimed at improving the navigability of the Bulgaria/Romanian Danube common section.
