Development of Sofia Railway Junction: Sofia-Voluyak railway Section

2014-BG-TMC-0133-W

Orient/East-Med Corridor

The city of Sofia is one of the main railway nodes of the Balkans. The proposed Action aims to improve the Sofia-Voluyak railway section, located on the Orient/East Mediterranean Corridor, by carrying out the relevant works

The Action is part of a Global Project covering the overall development of the Sofia railway junction.

The Action covers seven activities:

- land acquisition
- construction works
- ERTMS deployment
- supervision of construction works and ERTMS deployment
- interoperability assessment
- archaeological monitoring
- project management and communication

The Action is expected to have a positive impact on traffic management, modal split, congestion, inter-operability, service quality, safety/security and on environment by shifting traffic from road to rail.
