Upgrading of the Poljčane-Slovenska Bistrica railway line

2014-SI-TMC-0537-W

Baltic-Adriatic and Mediterranean Corridors

The Slovenian railway line "Celje-Pragersko" is located on the Baltic-Adriatic and Mediterranean Core Network Corridors. The line currently represents a bottleneck in passenger and freight transport due to insufficient load capacity and limited interoperability. The Action concerns construction works for upgrading of the "Poljčane-Slovenska Bistrica" double-track section with the main objective to increase the load capacity and improve the interoperability of the railway line.

The Action concerns construction works in the Poljčane station, the Poljčane-Slovenska Bistrica section and the Slovenska Bistrica station. The works cover reconstruction of substructure and superstructure, construction of platforms, grade-separated crossings, underpasses, as well as adjustments of energy, signalling-safety and telecommunication devices.
